

90.00 mm

For the use only of a Registered Veterinary Practitioner or a Hospital or a Laboratory or a Farm.

Co-trimazine Tablets BP (Vet)
Veko Nurdin™ DS

Bactericidal

COMPOSITION:
Each uncoated tablet contains:
Trimethoprim BP.....400 mg
Sulfadiazine BP.....2000 mg
Excipients.....q.s

INDICATIONS:
Veko Nurdin DS Tablet is a combination of two antibacterial drugs useful in infections of GI tract, Respiratory & Urogenital tract of Cattles.

DOSAGE AND ADMINISTRATION:
Dosage:
One tablet per 80 kg bodyweight daily in two divided doses.
Treatment should be repeated daily until three days after the symptoms have resolved, but in cases of salmonellosis and bacterial pneumonia treatment should be continued for 5 consecutive days. Treatment must not be continued for more than 5 days.

The product may be administered whole, by hand or balling gun, or dispersed in water. Dosage by dispersion in water: Disperse each bolus by shaking in about 300 ml of water in dosing bottle. This may be facilitated by crushing the bolus before placing it in the bottle. After dosing by this method any unused material should be discarded. Or As directed by the Veterinarian.

ADMINISTRATION: Oral

TARGET SPECIES: Cattle

PHARMACODYNAMIC PROPERTIES:Pharmacotherapeutic group: Antibacterials for systemic use. ATCvet code: QJ01EW10

PHARMACODYNAMICS:
Sulphadiazine (SDZ) inhibits the incorporation of para-aminobenzoic acid into folic acid and trimethoprim (TMP) inhibits the enzyme dihydrofolate reductase (DHFR)

120.00 mm

which converts dihydrofolic acid into tetrahydrofolic acid. TMP and SDZ act together synergistically with a double-blockage mode of action. The combination is bactericidal inhibiting sequential steps in the synthesis of purines which are required for DNA synthesis. TMP-SDZ combinations have a broad bactericidal action against many gram-positive and gram-negative aerobic bacteria, and a large proportion of anaerobic bacteria.

WARNING & PRECAUTION:

- Do not exceed the recommended dosage.
- Determine the bodyweight accurately before treatment to ensure correct dosage.
- Wash the hands thoroughly after use.
- In case of accidental ingestion, seek medical advice immediately and show the package leaflet or the label to the physician.

CONTRAINDICATIONS:

Do not administer to animals other than those for which it is indicated. Hypersensitivity to any of the Ingredients.

WITHDRAWAL PERIOD: Meat : 15 days after the latest treatment

STORAGE: Store in a dry place. Protect from light.

PRESENTATION: 10 Blisters of 4 Tablets each are packed in a carton along with the Pack Insert.
