Terbinafine 1% powder

CanTinea[®] Dusting Powder

*Anti Fungal Deodorant Powder
For topical use on Camels .*

COMPOSITION:

Terbinafine Hydrochloride BP
Equivalent to Terbinafine.....1% w/w
Excipientsq.s.

INDICATIONS:

CanTinea Dusting Powder is used to tackle Tinea infections and is an effective Anti-fungal treatment deodorant powder .

DOSAGE AND ADMINISTRATION:

Administration:

For external topical use.
The powder should be dusted liberally over the body and rubbed thoroughly down to the skin. Begin at the head and work back. Be sure to include feet and legs.

PHARMACODYNAMIC PROPERTIES :

Terbinafine is an allylamine derivative reported to have a broad spectrum of antifungal activity. It is considered to act through inhibition of fungal sterol synthesis. Terbinafine is fungicidal against dermatophytes and some yeast.

WARNING & PRECAUTIONS :

- Wear gloves during application.
- Do not dust into eyes or nose. If the product is in contact with eyes, rinse immediately with plenty of water.
- Do not use in Camels with extensive skin lesions.
- Do not use on sick or convalescent animals.
- Do not smoke , drink or eat while application in progress.
- Do not treat Camels with other insecticides at the same time.
- Keep away from food, drink and animal feed.
- Wash the hands thoroughly after use.

CONTRAINDICATIONS:

Do not administer to animals other than those for which it is indicated.
Hypersensitivity to any of the Ingredients

90.00 mm

120.00 mm

SIDE EFFECTS :

In rare cases, it has been observed that more sensitive animals have hypersensitivity and itchy skin after treatment. If you notice any serious effects consult your veterinarian immediately.

Prevent inhalation by the animal. If the product has been swallowed accidentally, animal can develop signs of intoxication with carbamates, such as excessive salivation, pupil contractions, vomiting or diarrhea. In these cases consult your veterinarian immediately.

OVERDOSAGE :

In animal tests there were no signs of irritation after a double dose compared to the recommended dose. Repeated overdoses and swallowing may, however, lead to signs of carbamate intoxication in humans and animals, such as excessive salivation, pupil contraction, vomiting or diarrhea. In these cases consult your veterinarian immediately.

SAFETY:

It is safe with no any toxic effects when used as recommended.
It is not absorbed by skin and stays on for longer duration to provide effective protection

TOXICITY:

If animal consumes or licks accidentally , contact your veterinarian immediately for symptomatic treatment. Only for use by or under the observation of a registered Veterinarian.

STORAGE:

Store in a cool and dry place.

PRESENTATION:

100gm powder in a labelled HDPE dumb-bell shaped bottle .
