Doxycycline for Oral Suspension 10 mg/ml

DOXYKO™ -OS

Veterinary Dry Powder for Oral Suspension

COMPOSITION:

Each 5ml of reconstituted suspension contains:
Doxycycline Monohydrate USP equivalent to Doxycycline (Anhydrous).....50mg
Flavoured syrup Base.....q.s.
Colour : Sunset Yellow F.C.F
(Vanilla Flavour)

INDICATIONS:

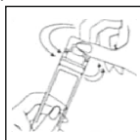

- Doxycycline is a bacteriostatic antibiotic used to treat infections in cats and small dogs caused by susceptible bacterial infections such as urinary tract infections, respiratory infections, blood-borne infections and wound infections.
- Doxycycline is especially useful for treating tick-borne bacterial diseases such as Rocky Mountain spotted fever, ehrlichiosis and water-borne infections such as leptospirosis.
- It is effective in the treatment of snuffles for cats, bacterial infections and other chronic infections like Haemobartonella, Campylobacter, Staphylococcus, Pyoderma, Osteomyelitis and Prostatitis.

DOSAGE AND ADMINISTRATION: Dosage: The typical dose administered to animals is 5 mg/kg every 12 hours orally for 7 days or As directed by the Veterinarian.

Directions for Mixing Oral Suspension:

Shake and tap the bottle to loosen the powder.

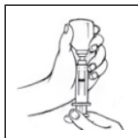

Twist and open the vial of Sterile water given with the pack.

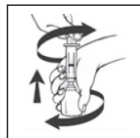

Add Sterile water to the powder. Put the cap and shake bottle vigorously.

Attach the dosing syringe to the bottle by gently pushing the adaptor onto the top of the bottle.

Turn the bottle/syringe upside down. Pull the plunger out until the black line on the plunger corresponds to the dog's bodyweight in pounds.

Turn the bottle rightway up and with a twisting movement separate dosing syringe from the bottle.

Push the plunger to empty the contents of the syringe onto food or in dog's mouth.

A suspension should be used within 7 days after reconstitution.

Front

TARGET SPECIES:

Dogs & Cats.

PHARMACODYNAMIC PROPERTIES:

Pharmacotherapeutic group: Antibacterials For Systemic Use.
ATCVet code: QJ01AA02

PHARMACODYNAMICS:

Doxycycline: It is active against a large number of Gram Positive and Gram negative pathogens including strains resistant to first generation tetracyclines. It is essentially bacteriostatic; it inhibits the bacterial protein synthesis by blocking binding of transfer RNA to the messenger RNA- ribosome complex.

WARNING & PRECAUTION:

Rarely, animals may develop diarrhea or loose stools from oral doxycycline. This is related to a change in the bacterial population in the animal's intestine. If diarrhea is observed, your veterinarian should be notified, and a change in medication may be indicated.

CONTRAINDICATIONS:

Do not administer to animals other than those for which it is indicated.
Hypersensitivity to any of the Ingredients.

OVERDOSAGE:

Occasionally vomiting has been observed, especially when high doses are administered.

WITHDRAWAL PERIOD:

None .

STORAGE:

Store below 25°C in a dry & dark place. Protect from light & moisture. Do not freeze.

PRESENTATION:

DOXYKO - OS is supplied in 25 ml HDPE Bottle with white HDPE cap enclosed in a Primary mono carton along with 0.5 ml-5ml marked polypropylene Syringe with Adaptor , 25 ml Sterile Water for Injections & a Pack Insert.

KEEP OUT OF REACH OF CHILDREN & PETS, AWAY FROM FOOD.

Carefully read the accompanying instructions before use.

**VETERINARY.
NOT FOR HUMAN USE.
FOR ANIMAL TREATMENT ONLY.**
